

Feedback Survey Questions

Students are required to create a list of 10 - 15 questions to assist with their own review and improvement of the lesson delivery, which can be utilised after each session.

The survey will need to address all key areas of this task and students may wish to structure their questions around:

Were session objectives explained?

Were group members background's discussed and spoken of (how did the facilitator find out the background of all members of the group including information on their styles, aspirations, cultures and perspectives)?

Were group goals for this session set?

Did the instructor use an effective communication style?

Was the session enjoyable?
